ABSTRACT

This "idea" is to deal with the day to day problem which is faced by cops and public as well. By the idea of "SAFE DRIVING USING ALCOHOL DETECTION" we are trying to reduce the number of accidents and loss of life and financial revenue. So, the idea is that to mount a (MQ3) Alcohol sensor on the steering wheel of the car such that when a person is drunk over the limit the electrical power is turn to low state and the car will not start up. By this we could feel a bit safer about our loved once. This could also be a huge benefit to the cops as well. As they have to risk their live while conducting a breath check on roads where people breaks the rule in fear of getting caught.
